

Skills Audit for Directors of Multi-Academy Trusts

Completed and collated in November 2020 (9 returns)

Analysis of returns:

- the membership of the Board provides a comprehensive set of skills for Directors to carry out their strategic role
- across the six features of effective governance, all received an average rating of 4 or more in consolidation across the Trust Board
- the Board has identified a need to supplement its skills set by the recruitment of suitably skilled Directors from outside the world of education, to provide a balanced and multi-dimensional Board fit for the future. MHAT has done this with the help of Academies Ambassadors and recruited new Directors for the desired skills set.
- the Board has identified some areas for training, the programme for which will commence during this academic year. This will also include succession planning
